

Dr Lucy,

15 JUL 2022

11-7-22

I couldn't cope on  
16 hrs of Gabapentin but things  
seem OK on 24 hrs so  
would you please "up the dosage"  
on the computer. I'm running a bit low.

It always takes a few  
weeks to settle down but life  
is better now than it was a few  
weeks ago. Hisa BC has, I'm  
afraid, defined my life of the  
last 30 odd years but at least  
things are better now we're around  
pills that don't give me panic attacks.

Thank you,
